GIVING WASTE PROFESSIONALS THE INFORMATION THEY NEED TO  
CHART THE COURSE TO SUSTAINABLE MATERIALS MANAGEMENT.

APRIL 2013

## WASTE EXPO 2013

Let the good times roll as WasteExpo returns to New Orleans.

# More ways to achieve less odor.

## Ecosorb® eco-friendly odor systems.

When it comes to naming the smelliest places on Earth, you're hard pressed to top transfer stations, landfills and composting facilities. But even these are no match for the non-hazardous and biodegradable power of our Ecosorb® odor control systems. Our unscented and effective formulations quickly destroy odors to create an odor neutral environment that's preferred by employees and neighbors alike. And with a variety of proven Ecosorb® products, we can address any solid waste odor imaginable.

## CART MAINTENANCE-CLEANING PRODUCT SURVEY

### AquaTools Inc.

RANCHO CORDOVA, CALIF.

#### AaquaBlaster Model 244 Cleaning Head

- A self-rotating cleaning head that operates at reduced flow and high pressure producing a strong cleaning impact.
- Designed to be used with hot or cold water.
- The rotational speed of the turret is calculated based on the amount of flow (GPM) provided to the device.
- Rated pressure from 580 to 2000 PSI.

### Gamajet Cleaning Systems Inc.

EXTON, PA.

#### CartKlenzR Cleaning System

- Patented rotary impingement cleaning utilizes power rather than time and chemicals to clean 100 percent of the bin in under 90 seconds.
- Operates off of a standard pressure washer at 4 GPM.
- Can use hot or cold water.
- Single or dual stations are available, as are custom sizes.

### Ginove

ST-CASIMIR, QUEBEC

#### G-Wash STD II Trash Can Cleaning System

- Electrically-controlled tipper lifts and positions the opened cart in place over the sprayer assembly.
- GINOVE water separation system allows gray water to drain into the sewer system or elsewhere, while solid waste gathered in the bottom is easily removable and may be compostable.
- Features a 40- to 50-second wash cycle per cart, washing 50 to 55 carts per hour.
- Hydraulic, 360-degree rotating water jets provide uniform cleaning.

### OMI Industries Inc.

LONG GROVE, ILL.

#### Ecosorb Natural Odor Neutralizer

- Reacts on a molecular level to neutralize odors, rather than eliminating them.
- Effective against both organic and inorganic odors.
- Natural, organic and nontoxic composition makes it safe for humans, animals and the environment.
- Custom engineered solutions for waste and recycling industry applications.

To be considered for inclusion in the Products section, just email a press release or product spec to Waste Age Editor Steven Averett at [saverett@wasteage.com](mailto:saverett@wasteage.com). The editorial staff will review it, and each month we'll publish the products we find most interesting.

## OMI Industries

New to **OMI's** industrial equipment lineup, vapor phase delivery systems bring efficiency and reduced capital expense to end-users. Vaporization provides an environmentally friendly option for the delivery of Ecosorb odor control products in dry mist form. Vapor phase systems are simple to install, operate, and maintain, and require no nozzle maintenance and no water, mixing, or dilution. For more information, visit [www.omi-industries.com](http://www.omi-industries.com).

## RSC Bio Solutions

**RSC Bio Solutions** is a sister corporation to Radiator Specialty Company (RSC) focused on providing high performance chemistries that are safe, non-hazardous and environmentally responsible. It combines the most powerful line of biodegradable hydraulic fluids, cleaners and degreasers, as well as an eco-friendly, multi-purpose absorbent - providing a new alternative in serious solutions when safety and performance are equally essential.

Visit us at **Booth #4767** at the Waste Expo and online at [www.rscbio.com](http://www.rscbio.com).

## Petro-Canada

**ENVIRON** hydraulic fluids deliver advanced protection for environmentally sensitive areas

The full ENVIRON line of inherently biodegradable hydraulic oils is manufactured from **Petro-Canada's** 99.9% pure base oil—among the purest in the world. With its advanced oxidative stability, ENVIRON offers longer oil life, which can translate into fewer change-outs and less sludge and varnish deposits. It provides better wear protection and lasts up to 8 times longer than the leading vegetable-based hydraulic fluid. ENVIRON is non-toxic, recyclable, odorless, and metals-free, helping operations maintain the highest levels of safety and meet crucial EPA guidelines.

For more information please visit **Booth #2222** or [www.lubricants.petro-canada.ca](http://www.lubricants.petro-canada.ca)

## Schroeder Industries

**Schroeder Industries** Fuel Filtration Systems are designed to help our clients achieve the most rigorous new diesel fuel quality standards. Advanced diesel filtration is essential to achieve the fuel cleanliness required by new Tier IV high pressure, common-rail engines and to remove over 99.9% of water. We offer a full range of:

- Fuel and Biofuel Filtration and Pre-Treatment Products
  - Coalescing Filtration
  - Bulk Diesel Skids
- On-board Diesel Filtration
  - Custom Fuel Skids
